

CLOUD SERVICES

Delivering extraordinary service and subject matter expertise to assist our clients accelerate their IT advancements and efficiently implement cloud migration strategies.

DISA CAP SUBMISSION

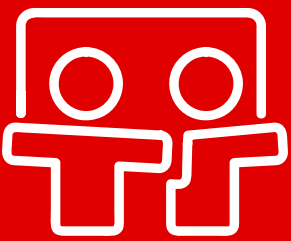

ISG personnel works closely with the Mission Owner to develop documentation and engineering artifacts needed register the Cloud IT Project with DISA and obtain authorization to connect to the DISA Secure Cloud Computing Architecture. ISG has assisted several agencies with authorizations up to Impact Level 5.

ATO/RMF APPROVAL PROCESS

Once C-ITP registration in SNAP and issuance of a Cloud Permission to Connect has been approved, ISG personnel will assist in the ATO/RMF approval process, including consulting on the controls, control enhancements and security overlays necessary to be in compliance with the appropriate security framework corresponding to identified Impact Levels.

NETWORK ENGINEERING

Once ATO has been approved, ISG can assist with the DISA SCCA (secure cloud computing architecture) onboarding process. Our personnel possess decades of experience working with DISA at all tiers of DOD network architecture.

ABOUT ISG
